

PROGRAM OF THE TUNNELING MASTERCLASS (3 DAYS)

- PREOPERATIVE ANALYSIS OF DENTAL AND MUCOGINGIVAL ANATOMY
- DECISION TREE AND COMPARATIVE THERAPEUTIC OPTIONS
- RECONSTRUCTION OF THE CEMENTOENAMEL JUNCTION
- CTG HARVESTINGS:
 - Palatal grafts and palatal protection methods
 - Tuberosity grafts
 - Biological properties and specific indications of CTG according to their origin
- TUNNELING TECHNIQUES
 - Intra-sulcular approach
 - Apical window approaches
 - Combined approaches
 - Layering options

- TREATMENT OF RECESSIONS IN THE MAXILLA
 - Tunneling techniques specific to the maxilla
 - Surgical techniques available for the maxilla:
 - Coronally advanced tunnelized flaps
 - Conventional submerged grafts
 - “Expanded” submerged grafts
 - Submerged micrografts
- TREATMENT OF RECESSIONS IN THE MANDIBLE
 - Preoperative analysis of mucogingival, muscular anatomy and anatomical constraints
 - Tunneling techniques adapted to the mandible
 - Surgical techniques available for the mandible:
 - Partially exposed grafts
 - Submerged grafts:
 - Lateral closure
 - Apical closure
 - Dual closure (lateral and apical)
 - Alternatives to tunneling: emerging trends in free grafting
- TREATMENT OF RECESSIONS AT IMPLANTS
- PAPILLA SURGICAL RECONSTRUCTION ?

ADDITIONAL INFORMATION

EDUCATIONAL MATERIALS AND TRAINING MODELS

A theoretical course, illustrated with photos and videos, serves as a guiding thread and provides context for practical exercises. Each concept, method, or technique discussed is immediately applied using multiple educational supports.

MEALS AND REFRESHMENTS

The training fee includes morning and afternoon refreshments, as well as lunch.

SCHEDULE

The training is very intensive, so we recommend arriving well-rested!

Each day will begin promptly at 9:00 AM. We ask that you **arrive around 8:30 AM** to gather over coffee and pastries. Lunch break will be between 1:00 pm and 2:00 pm. Trainings will **end around 6:00 PM**, except for the last day, the master class will end around 4 pm to 5 pm to allow participants to catch trains, planes...

SPECIAL RECOMMENDATIONS

From a practical standpoint, we provide everything essential for the training: work models, microsurgical instruments, sutures, blades, microblades, etc.

However, to make the exercises more beneficial, **we very strongly recommend bringing your own loupes/light (a magnification of 2.5 to 5x is ideal).**

We also recommend reviewing the book *Tunnelisation* AND Dr. Ronco's publications beforehand to familiarize yourself with the treatment philosophy and surgical concepts that will be covered. This will help you get even more out of the hands-on sessions.
